- 1) Season began with distribution of equipment and the setting up of the screens for excavation areas.
- 2) West Zone
  - a) Continued work in Squares DI39 (with the NE corner of DI38 and the west edge of DH39)
    - i) Goal = identify the south end of the Beta Building and the function of the space intervening between it and the Alpha Building to the south
    - ii) Basket = surface material, none collected
    - iii) Starting elevation = 130.394
    - iv) Ending elevation = 130.3413333 (average south of W1945); 130.4803333 (top of W1945); 130.401 (average north of W1945)
    - v) Soil is disturbed by tractor and excavation traffic
    - vi) Identified and exposed the eastern top section of W1945. It is parallel to W1286 and moves east from the doorway in W1285. We expect it to form a corner with the newly named W1946, the western wall of the Beta Building. Alignment is based on observation of the corner from the west. The top section exposed is 2.9m from the east line of W1285.
    - vii) May have identified the interior (eastside) of W1946.
  - b) Continued work in Square DJ39.

    - v) Soil is destruction fill (surface).
    - vi) Removed 20 cm of fill and the first layer of larger rocks in the fill.
